

## InjectMATE

Remote controlled chemical injection system for nitrogen stabilizers.

### System Overview

Self-contained, remote controlled, 12-VDC, 100 PSI rated chemical pumping system for the injection of nitrogen stabilizers.

### Operation

Connect the power to your pump tractor, either weld in the included 3/4" fitting to your load stand, or purchase a pre-made coupler of your choice from FarmChem. Connect the chemical supply to the pump, purge and calibrate. Key fob remote control is then used to inject the stabilizer into the manure stream while you are loading your applicator or tender wagon. Strobe light indicates when the system is dispensing.

### Benefits & Features

LCD Display indicates total loads and ounces dispensed. Key chain remote control included for manual in cab activation. Positive displacement metering pump design eliminates suction and pressure concerns, and accurately dispenses consistent volumes each pump stroke. Connects directly to mini-bulk with 1" x 12' suction hose. 25' discharge hose included. 3/4" weld in fitting included

Description	Item no.	Price*
12-VDC InjectMATE Pump Kit	MMP100	\$2,450.00

## Replacement Parts

Description	Item no.	Price*
Key fob remote control	INJECTMATEREMOTE	\$41.17
Manure nozzle replacement	MANURENOZZLEKIT	\$86.93

## Tank Options

Description	Item no.	Price*
15 gallon cone tank for InjectMATE	INJECTMATETANK	\$159.60
30 gallon cone tank for InjectMATE	INJECTMATETANK30	\$189.05

## Coupler Options with Fitting for Manure Nozzle

Description	Item no.	Price*
6" Balzer manure nozzle coupler	INJECTMATE6CO	\$109.61
8" Balzer manure nozzle coupler	INJECTMATE8CO	\$247.44
6" Houle manure nozzle coupler	HOULECOUPLER6	\$141.95
8" Houle manure nozzle coupler	HOULECOUPLER8	\$174.97
